- **Technologies:** HTML/CSS, SASS, REST API

PROJECTS

Music App | *ReactJS, Redux, Hooks, HTML/CSS, SPA* | [GitHub](#)

- Developed music app with login/signup functionality, song filtration, playlist suggestions and opportunity to build users playlist
- Utilized React Hooks and Redux library for fetching and storing data

Memory game | *JavaScript, HTML/CSS, Webpack* | [GitHub Demo](#)

- Developed a classical memory card game with 3 levels, where a user can choose a difficulty level and try his/her skills in memorizing multiple cards in 5 seconds. By the end of the round user can check how much time it took to win or lose

Multiplayer rock-scissors-paper game | *JavaScript, HTML/CSS, SPA, AJAX* | [GitHub Demo](#)

- Built an online rock-scissor-paper game
- Implemented a login logic, see players that are online, start a new game with a random player
- Designed in raw JavaScript (no libraries)

Furniture store landing page | *HTML/CSS, SASS, Responsive design* | [GitHub Demo](#)

- Developed a landing page, that is compatible with tablet and mobile browser versions
- Implemented Main, Catalog and Cart pages
- Built with using HTML/CSS and SASS technologies
